### REPORT OF THE DIRECTOR OF EDUCATION FOR THE YEAR 1926.

---

#### Summary of Contents.

Staff.  
Pupils in Government Schools.  
    British Schools.  
    English Teaching Government Schools (for other than  
        British Pupils).  
    Grant Schools.  
    Vernacular Schools.  
    Normal Schools.  
    The Technical Institute.  
Board of Education.  
Board of Examiners.  
Health.  
School Playing Grounds.  
Revenue and Expenditure.

---

#### Annexes.

---

A.—Report of the Inspector of English Schools.  
B.—      ,,      Director, Technical Institute.  
C.—      ,,      Inspector of Vernacular Schools, Urban  
                Districts and Rural Districts.

---

#### Tables.

I.—Board of Education.  
II.—Board of Examiners.  
III.—Government Schools.  
IV.—Grant Schools.  
V.—Amount of Fees Remitted to Free Scholars during 1926.  
VI.—Subsidized Schools in the Colony.  
VII.—Subsidized Schools in the New Territories.  
VIII.—Chart shewing numbers in Schools 1901-1926.  
IX.—University, External Examinations.  
X.—Technical Institute.  
XI-XX.—Scholarship Accounts.

1.—STAFF.

Mr. A. E. Wood acted as Director of Education throughout the year

Mr. A. R. Cavalier, European Inspector of Vernacular Schools, retired on pension, with effect from 31st January, 1926.

The retirement of Mr. B. Tanner to which reference was made in last year's report, took effect from 27th February, 1926

Mr. F. K. Ewart and Mr. L. G. Morgan joined the staff on appointment from England.

Miss E. K. Bailey and Miss O. M. Orme married and left the Colony, to the great loss of this Department. Miss C. Peyton joined the Permanent Staff.

At the end of the year the staff consisted of:—

	British.		Non-British.		Total.
	Men.	Women.	Men.	Women.	
Inspectors .....	2	...	3	...	5
Sub-inspectors .....	...	...	8	...	8
Teachers .....	25	16	132	35	238
Total .....	27	16	143	35	251

Eight Students-in-Training graduated at the University and were appointed to masterships in Government Schools. At the end of the year the number of University Trained Teachers Graduated on the staff was 15.

2.—PUPILS IN GOVERNMENT SCHOOLS.

Particulars and Statistics of the various Government Schools are given in Table III.

A.—BRITISH SCHOOLS.

Quarry Bay Junior School again had a most successful year. The fine new building, a model of its kind, built by Messrs. Little, Adams and Wood, was ready for occupation in September and a pleasant inaugural ceremony took place later in the year, when the pupils gave a display of gymnastics and dancing which did great credit to the physical instruction of Miss Dyer.

We have to thank Messrs. Butterfield and Swire for their manifold help and interest in connection with this school.

Kowloon Junior School was attended in such force that the available accommodation was unduly taxed. Plans were prepared and provision was made in the 1927 Estimates for an addition to the building. Similarly plans for a much needed extension to the Central British School were considered, but it was not found possible to make financial provision.

#### B.—ENGLISH-TEACHING GOVERNMENT SCHOOLS.

(FOR OTHER THAN BRITISH PUPILS).

In December 1924 the total number of pupils was 3,339. In December 1925 it had dropped to 1,898 and in December 1926 had recovered to 2,852. (These figures are exclusive of the Indian School, which contains about 100 pupils).

After the strike panic was ended, the temptation to flood our schools without regard to the requirements of proportionate growth, was, I am glad to say, resisted.

Saiyingpun School, which had an honourable career since it was founded in 1891, passed on to a higher destiny in September. In its magnificent new quarters on Bonham Road, re-named by His Excellency King's College, great achievements are expected from it under the able headmastership of Mr. Morris.

Throughout the year we have had to contend with a considerable shortage of British Staff, and though steps have now been taken to make conditions of service more attractive to the right type of young teacher from home, we have so far failed to get the numbers for which we have asked.

Fortunately we have been able to engage a number of Temporary Mistresses locally and these have given admirable service.

The English Teaching Chinese Staff received an addition of eight newly-graduated University Trained Teachers.

Before graduation as Bachelors of Arts these teachers are prize Students-in-Training at Hong Kong University where they take a special 4 years' Educational Course in the Arts Faculty under the Professor of Education with practical help from the Master of Method, the Head of King's College.

Much is looked for from these specially trained men. Though in these schools the emphasis is naturally laid on English teaching, great attention is also paid to Vernacular Studies, and promotion from class to class depends on adequate proficiency in Chinese as well as English. This *pari passu* system is an essential and valuable part of our Educational programme.

C.—GRANT SCHOOLS.

These remain unchanged. Almost without exception, their work has been admirable, and the Colony owes a great debt to these schools.

Statistics are given in Table IV.

D.—VERNACULAR SCHOOLS. (Tables VI and VII).

An important step was taken in the development of Vernacular Education by the opening in March of the Government Vernacular Middle School, containing not only Middle School Classes but also a Normal division and a Higher Primary division. The object of the school is threefold: it hopes to turn out young men equipped for a business life with a sound education in which Chinese studies have played the principal part, but practical teaching of English has not been neglected. Secondly, it aims at producing good Chinese teachers for Vernacular Schools, and thirdly, it hopes to educate students in such a manner that they will be able to pass on to the University and there specialise in the study of Chinese language, literature, history and philosophy. It is too early yet to say much about this school but the keen interest shewn by Chinese residents promises well for its future, provided that we on our side do all in our power to maintain a high standard.

The number of private urban vernacular schools was 545 and of pupils 28,102. About one third of these, *viz.*, 191 schools with 10,665 pupils received subsidies from the Government.

The rural vernacular schools numbered 191, of whom 107 received subsidies.

With regard to Vernacular Education generally, it seems to me that the standard in Hong Kong is probably higher than ever before.

I think that curiously enough this is partly the outcome of certain modern movements in Canton and the province of Kwong Tung. In Hong Kong the teaching of the Confucian classics is not suppressed, and moderate Chinese opinion realises how important it is to build on the old foundations. At the same time our Vernacular Inspectorate does a great deal to encourage the use of good modern methods of teaching and school management, and we are able now to reject, after examination, many incompetent would-be teachers in private Vernacular Schools.

In this respect the Government Vernacular Normal School for Women has done particularly good work in turning out well-qualified women teachers for the Vernacular girls' schools of the Colony.

As an indication of the prosperous state of many Vernacular schools, it may be observed that a number of private schools now charge as much as \$100 a year for each pupil.

This department constantly endeavours to see that political propaganda and agitation are rigidly excluded from the schools of the Colony.

This is a difficult subject and I do no more than touch on it here to show that it does not escape our attention.

#### E.—NORMAL SCHOOLS.

Reference has been made in the previous paragraph to the good work of the Vernacular Normal School for Women under Miss Chan Yat Hing. The number of students was 113, as against 49 in 1925, and arrangements were made to move in to new and larger rented premises at the end of the year.

A new Government Vernacular Normal School was started at Taipo in March. Accommodation has been rented to provide not only for class-rooms but also for lodging of students, who come from distant parts of the Territory. The teacher is a former pupil of the Men's Vernacular Normal School in Hong Kong, where he had taken a specially extended course. It is hoped that in due course this New Territory experiment will bear fruit and produce capable Vernacular teachers for the country districts.

#### F.—TECHNICAL INSTITUTE.

The Technical Institute designed to supply instruction in various subjects for those desiring the opportunity of evening study, was well attended. Details are given in Table X.

#### G.—BOARD OF EDUCATION.

The Board met eleven times during the year.

Capt. J. Charnock was appointed as from January 15.

Rev. H. R. Wells, O.B.E. was appointed as from April 8 to act during the absence on leave of Rev. T. W. Pearce, O.B.E., LL.D.

Rev. T. W. Pearce, O.B.E., LL.D. was reappointed as from April 9.

Rev. A. D. Stewart was reappointed as from April 9.

Mr. S. W. Tso, LL.D. was reappointed as from April 9.

Mr. H. B. L. Dowbiggin was appointed as from April 15

Rev. G. R. Lindsay was appointed as from May 22 to act during the absence on leave of Mr. B. Wylie.

Dr. Wan Man Kai was reappointed as from June 9.

Mr. L. Forster was reappointed as from July 27.

Mr. B. Wylie's tenure of office expired on October 27.

Rev. G. R. Lindsay was appointed as from October 27.

Dr. Hickling was reappointed as from December 5.

#### 4.—BOARD OF EXAMINERS.

The Board met 15 times and held six examinations of Hong Kong Cadets and police probationers, 13 examinations of Subordinate officers under G.O. 115 and one examination of an officer studying for Bonus under G.O. 120. In addition to this, Language Examinations of police officers and Gaol Warders were conducted by the Sub-Committee at the police Head Quarters every Tuesday afternoon.

#### 5.—HEALTH.

Mrs. Minett, M.D., B.S., D.Ph., did admirable work as M.O.S. The following are extracts from her report:—

“Sixteen Government schools were inspected. The scheme of inspection used is that laid down by the Board of Education in England, it appearing wise to follow on established lines until results show where modification would be an improvement.

The new entrants for the year were therefore taken as a group. The inspection was this year individual and thorough, heart and lungs being included in the examination of each child.

Total number of children examined .....	1104
No. found to have some health defect .....	407
No. of special cases, and cases re-inspected .....	196
Percentage of defect in British Schools .....	41.0%
“ “ “ “ Anglo-Chinese Schools...	38.8%

#### *Vision.*

Vision defect, requiring glasses, British Schools.	6%
“ “ “ “ “ “ Anglo-Chinese “	16%
Cases of vision defect seen by Dr. Morrison .....	258
“ “ “ “ “ “ provided with glasses .....	215

Special card records of the vision cases were not kept until after the beginning of the year, so that the 16% of defect is likely to be an understatement.

*Teeth.*—Conservative dental treatment is much needed for the younger British children, for decay in the temporary teeth leads almost invariably to unhealthy throat conditions, and later to decay in the permanent teeth, with resulting loss in digestive power.

*Throat and Nose, Heart and Lung.*—Throat and nose defect is somewhat less prevalent here than in England; and rheumatism and rheumatic fever being apparently unknown among Chinese children, very few cases of heart defect are found. Lung subnormality, which in poor hygienic surroundings promises to go on to consumption, is not rare, and a few cases of actual tubercular disease have been found. Good chest capacity being one of the best defences against chest disease, it is important that, in view of the high consumption rate here, the children should be taught to exercise their lungs as much as possible. This is a matter in which drill and games will be of great benefit.

The physique and posture of girls at Belilios Public School showed marked improvement after drill lessons were instituted.

*Grant Schools.*—It was not possible to carry out individual inspection of the children in the Grant Schools, but 13 schools were inspected as to premises, and any special cases among the children were seen.

The remaining grant schools have their own medical advisers, who make a half-yearly report on premises and general health.

*Teaching of Hygiene.*—Classes in school hygiene and elementary physiology are now being added to the curriculum of the Technical Institute, and hygiene is being made a compulsory study in the training of teachers. For want of a suitable text-book, for teacher or pupil, the hygiene notes of last year have been continued.

The year's inspection and record-keeping, which has been systematized, have given a fair idea of the health conditions here. Enumeration of defects, and statements of percentages, are, however, of little value, unless remedial, and even more important, *preventive*, measures, are undertaken, and it is hoped to make more progress in this direction next year."

#### 6.—SCHOOL PLAYING GROUNDS.

An excellent ground at King's Park has been placed at the disposal of Yaumati School, and is much appreciated. The

King's Park grounds allotted to the Central British School and Kowloon British School Old Boys' Association have also proved a great boon.

Queen's College ground at Causeway Bay which for long was a prey to roving cattle, pigs, and human beings, has now ! am glad to say been suitably fenced and our thanks are due to the Director of Public Works and Superintendent of Botanical and Forestry Department for their help. The turf will now get a chance.

A fair number of cricket matches was arranged between various schools and on several occasions a Combined Schools team played a University Eleven. I set great store by these games.

#### 7.—REVENUE AND EXPENDITURE.

The only Revenue collected by this Department comes from school fees, which amounted in 1926 to \$109,464.75 as against \$94,416.00 in 1925.

The Expenditure was \$910,063.09 a decrease of \$109,842.14 from the previous year. These figures do not include Expenditure on School Buildings or Furniture which are debited to Public Works.

The decrease was mainly due to less expenditure under Building Grants.

A. E. WOOD,  
*Director of Education.*

May 31st, 1927.

**Annexe A.**

REPORT BY THE INSPECTOR OF ENGLISH SCHOOLS.

GOVERNMENT SCHOOLS.

(Table III)

*Queen's College*:—Head Master, Mr. A. H. Crook, M. A.

The Maximum Enrolment was 537 (789 in 1925).

The Average Attendance was 452 (511 in 1925).

All pupils in Class 1 take the Matriculation or the Senior Local and all in Class 2 take the Junior Local Examination of the Hong Kong University.

Class 4 takes the "Annual Class 4 Examination" held by the Education Department; *Queen's College* presented 59 boys of whom 31, or 52.5 per cent passed.

The following remarks are extracted from the Head Master's Report,—

*Health*:—The increase in the percentage of attendance is on the whole a very good sign. It is one of the best tests of the health of a school, for, although some of the absences are not due to ill health, a good average attendance implies that the health is not bad.

We had no epidemics of any kind during the year, most of the sickness being transient ailments such as colds or fever which are so catching at the changes of the seasons.

Defective eyesight is one of the most frequent complaints of the Chinese. As compared with European children the short-sightedness (*Myopia*) of the Chinese children is quite noticeable.

The Government at great expense and trouble has the vision of all boys carefully examined and glasses provided for defectives.

*Behaviour*:—Discipline and morals generally, closely bound up as they are with health and social welfare, continue to be good.

The ordinary activities of the College were carried on throughout the year without the need for resort to any severe disciplinary measures. In connexion with this good order I wish to thank the prefects who performed their duties faithfully and well.

*Sports*:—The interest in the sports of the College was keen. The inter-class football and volley-ball competitions were entered into by all the classes. One of the great advantages of having a large number of classes is that these competitions can be more enthusiastically engaged in. Personally I much prefer the inter-class system to any inter-school or outside competitions. On this system more than half, and perhaps the whole, of every class gets certain exercises, and practically none of the evils resulting from the inter-school system arise. When there are inter-school contests a few boys get far too much training and exercises while the rest get practically none.

During the summer months we had our launch picnics for bathing. In these outings practically the whole school took part, indulging in that most enjoyable and natural of pastimes.

Unfortunately, owing to the fact that the V.R.C. could not lend us their swimming-bath, we were unable to have our annual aquatic sports.

Cricket was encouraged and matches were played with outside teams, but I regret to say that cricket, like tennis, is confined almost exclusively to the non-Chinese boys in the school—the Chinese only taking a very half-hearted interest in these games.

We had our annual School Sports in March. Thanks to the co-operation of the Old Boys' Association the gathering was even more successful than formerly.

In the Annual Examination at the close of the year in the lower school we examined 275 boys of whom 236 passed: in the upper school, 113 of whom 65 passed.

Classes I and II do not take any annual examination in this College but sit instead for the Matriculation, Senior Local, and Junior Local Examinations: and I am pleased to be able to say that at the Matriculation and Senior Local Examinations we have come up to, and in many respects surpassed, all our previous records. We obtained 16 passes in the Matriculation and 4 in the Senior Local out of a total of 28 who sat.

Four of these were put in the Honours list with a total of fourteen Distinctions.

The King Edward Scholarship, a much-coveted distinction, has again come to this College for the third time in its history. But this year we have been twice blest, receiving both King Edward Scholarships—a unique record as far as this College is concerned. Two of the honoursmen have also qualified for the valuable Studentships-in-training awarded by the Education Department, and tenable at the Hong Kong University.

In the Junior Local Examination we obtained 22 passes with 8 distinctions out of a total of 51 who sat for the Examination”.

*King's College (formerly Saiyingpun School).*—Head Master, Mr. A. Morris, A.C.P.

The Maximum Enrolment was 502 (413 in 1925).

The Average Attendance was 460 (327 in 1925).

The name of the School has been changed from “Saiyingpun School” to “King's College”.

Class 8 (in four divisions) was transferred to the New King's College building, occupying first the Gymnasium and later, the Class-Rooms on the top floor where they were joined by Class 7, after the Ching Ming Vacation.

The remainder of the School removed into King's College, in September after the Summer Vacation.

Fees were raised to \$60 per annum.

The results of the Half-yearly and Annual Examinations were very satisfactory. In Class 4, 81.5% of those examined qualified for promotion.

Boys are no longer sent to Queen's College after passing this (Class 4) Examination but remain at King's College, which now has classes preparing for the Matriculation Examination.

The Swimming Pool was used for the first time on October 13th, and was made full use of to the end of November; it was also used for the St. John Ambulance Brigade Aquatic Championship contests.

Demonstrations in Life Saving were given to the boys by representatives of H. M. Navy.

King's College is one of the finest and most modern of school buildings; it contains 29 Class rooms, Staff and Common Rooms, the latest Sanitary arrangements, Hat and Cloak Roorus, a Museum and Library, an Art Room, Physics and Chemistry Laboratories, a Workshop, Swimming Pool and Dressing Rooms, Gymnasium, Covered Playground, Fire Fighting appliances, and the usual complement of Store-rooms and offices.

On the recreative side it has Football, Volley Ball, Ping Pong and Swimming Teams, a Boy-Scout troop and an Ambulance Division. In December the Ambulance Division had the signal distinction of winning the Ralphs Shield, the most coveted of the St. John Efficiency Trophies. The Senior Volley Ball Team played matches against some of the leading Canton Clubs and were the winners of the Senior Volley Ball Shield.

*Ellis Kadoorie School*:—Head Master, Mr. F. J. de Rome, B.Sc.

The Maximum Enrolment was 423 (712 in 1925).

The Average Attendance was 398 (578 in 1925).

At the Annual Examination for Class 4, of 33 boys examined 29 (or 88%) passed.

In the other classes 325 passed out of 366 examined.

Discipline and health were good.

6 Prefects were appointed during the year.

Physical exercises were introduced in all classes, being taken by the class-masters under the supervision of Mr. J. C. Fletcher.

Games are popular. The School won the Small-Boy Volley-Ball Shield. The Boy-Scouts troop went into Camp at Stanley for 4 days during the China New Year Holidays.

The year has been very satisfactory, as regard both school work and games.

Former pupils continue to do well; two recently graduated in Arts, and several matriculated, at the Hong Kong University.

*Yaumati School*:—Head Master, Mr. A. O. Brawn.

The Maximum Enrolment was 257 (282 in 1925).

The Average Attendance was 246 (221 in 1925).

At the Annual Examination 246 were examined and 224 or 91% passed.

At the Annual Class 4 Examination 18 passed, or 75%.

The discipline and tone of the school continue very good.

The School library is now much used by the pupils.

Health has been good generally.

Sports are very popular and the school has been allocated a new sports ground in King's Park.

A very successful Sports' Meeting was held during the year.

*Wantsai School*:—Head Master, Mr. R. J. Birbeck, M. A.

The Maximum Enrolment was 210 (232 in 1925).

The Average Attendance was 203 (171 in 1925).

The Average Attendance was better than for several years past.

In the Annual Examination out of 206 examined 194 passed, while 77% (23 pupils) passed the Annual Class 4 Examination.

The English Speaking Club in Class 4 continues to flourish.

Discipline and health are satisfactory.

The school maintains its interest in games and held its Annual Sports' Meeting as in previous years.

Swimming is growing in popularity.

*Tai Po School*:—Head Master, Mr. Fung So.

The Maximum Enrolment was 64 (110 in 1925).

The Average Attendance was 52 (72 in 1925).

At the Annual Examination 43 boys passed out of 48 examined.

Pupils promoted from this school to senior schools continue to do creditable work.

Discipline and health were good.

The pupils have shown great interest in foot-ball in spite of the fact that the only ground on which they can play is a considerable distance from the school.

*Un Long School*:—Head Master, Mr. Lee King Shum.

The Maximum Enrolment was 58 (64 in 1925).

The Average Attendance was 43 (47 in 1925).

At the Annual Examination 35 boys passed out of 39 examined.

Writing, though legible, calls for improvement.

The health of the school was satisfactory and the discipline good. The boys are beginning to take an interest in games, and have taken up football.

*Chcung Chau School*:—Head Master, Mr. Lam Pak To.

The Maximum Enrolment was 68 (73 in 1925).

The Average Attendance was 59 (63 in 1925).

The Typhoon in September destroyed the school building. The school is now carried on in temporary premises, pending the erection of a new building.

At the Annual Examination 48 boys, or 90% passed.

All written work was neatly done and the results of the year's work generally were very satisfactory.

Chinese studies shew a considerable improvement.

Health and discipline continue very good.

The Annual Sports' Meeting was very successful and has become a popular institution in the Island.

*Belilios Public School*:—Head Mistress, Miss H. F. Skinner.

The Maximum Enrolment was 575 (560 in 1925).

The Average Attendance was 493 (458 in 1925).

The pupils attended with greater regularity than in previous years.

At the Annual Examination satisfactory results were obtained. In the Upper School (Classes 1-6) 88 were promoted out of 104 examined and in the Lower School 239 were promoted out of 371 examined. At the December University Matriculation and Senior Local Examinations 11 Candidates were presented; of these 4 were awarded Senior Local Certificates. At the Junior Local Examination 9 candidates were presented and 6 passed.

Needlework and Painting call for special mention.

Physical Drill has been introduced and is becoming popular.

Referring to changes in organization, the Head Mistress reports.

“During the year several changes of a progressive nature have been introduced, the chief being the extension of the study of English to the lower classes of the school. The Remove Class, which had previously had studies in the ratio of three hours Chinese to two of English was included amongst the English Classes, and the hours were changed to one and four respectively. In this way pupils are afforded an opportunity of reaching the standard of English required for the Junior Local in the remaining four years.

This change has proved a success and has been appreciated by the girls. It is now possible to carry the English teaching down two years further, two divisions of Class 7 and one division of Class 8 now learning English; an important result of this change is that girls are encouraged to pass from Class 7 to the upper school, and so pursue their studies up to the standard of the University Locals.

In 1925 the subject of Hygiene was introduced, by means of informal health talks, into the curriculum of the school.

In the lower classes these are given in Chinese, in the English junior classes they form the subject of colloquial lessons and in the senior classes the subject is treated formally as Domestic Science. In 1926 Domestic Science replaced Needlework as a subject for the Senior and Junior Locals. Needlework is taught five years in the junior and four years in the senior School; it was therefore felt that it could well be discontinued in favour of a wider and more generally useful subject. The old cookery kitchen was small and inadequate, and it was found possible last year to fit out as a kitchen a more suitable room. The subject of House-wifery has recently been introduced, and although it has not yet been possible to set apart a room for this purpose, it is hoped that certain structural alterations will render this possible. The girls are responsible for supervising the entire cleanliness and freshness of the building and the washing of paint and curtains; cleaning of windows, polishing of floors and care of plants in the cookery compound. Laundry work is also included in the House-wifery course.

A small room has been arranged as a library and a study for the senior pupils.

The Victoria Nursing Division of the St. John Ambulance Brigade still continues to be a very live interest in the school. Dr. Minett lectured during the year on First Aid and Home Nursing; in October fourteen candidates were examined by Dr. Hickling and all passed. The members attended two public parades in 1926, one on the occasion of H. E. the Governor's Annual Inspection and the other on the Investiture of His Excellency by H.R.H. Prince George.

Several pupils have expressed a wish that the school should become indented with the Girl Guide movement, and three members of the Staff together with two former pupils are training as officers with this end in view. It is hoped that patrols will be formed in March and the school is grateful to Mrs. Remington for the help she is giving.

An Old Girls Association has recently been formed. This new manifestation of esprit de corps is most welcome and the work Miss Lewis has done in connexion with the Association is much appreciated.

*Ellis Kadoorie School for Indians*:—Head Master, Mr. A. R. Sutherland, M. A.

The Maximum Enrolment was 112 (107 in 1925).

The Average Attendance was 98 (87 in 1925).

Mr. J. Ralston, M.A. acted as Head Master during the absence of Mr. Sutherland, on Leave.

At the Annual Examination 100% passed the Class 4 Examination and in the remaining classes 88% passed.

Written and Colloquial work were good throughout, and Urdu shewed a great improvement.

Discipline and health have been very good.

Physical Drill has been introduced and is taken by all Class Masters.

The School Garden, in spite of storm damage, continues to flourish.

Keen interest is taken by all boys in Cricket, Tennis and Football. At the Annual Sports' Meeting held in December almost every boy took part as a competitor.

A much-needed covered playground has been added to the School building.

*Gap Road School*:—Head Master, Mr. Lo Yuk Lun.

The Maximum Enrolment was 150 (149 in 1925).

The Average Attendance was 140 (124 in 1925).

The year's work was very satisfactory. 90% passed the Annual Examination.

Discipline and health continue to be very good.

Football is played with enthusiasm during the winter months, and during the summer several swimming picnics were held.

It is satisfying to report that pupils passing from this School to senior schools continue to do well: five recently passed the Matriculation Examination of the Hong Kong University.

#### BRITISH SCHOOLS.

There are 5 British Schools, four being Junior Schools and the fifth a first-class Secondary School. All these Schools are co-educational.

Among the special features of these schools are drawing and painting. The pupils are examined by the Royal Drawing Society and the following figures show the excellent results obtained this year:

Number of pupils examined .....	175
„ Honours Certificates .....	68
„ Pass Certificates .....	78

*Central British School*:—Head Master, Mr. G. F. Nightingale.

The Maximum Enrolment was 173 (178 in 1925).

The Average Attendance was 131 (113 in 1925).

The School is now very liberally equipped; there are good Chemistry and Physics Laboratories with a complete stock of apparatus and material required for the teaching of Chemistry, Heat, Light and Sound.

There is a well-trained and highly efficient Staff.

The number of pupils is steadily increasing and the building is too small to accommodate those already in attendance. Additions to the building are under consideration.

The attendance was generally good in spite of there being several cases of fever, malaria and dengue. The new entrants were medically examined by the M. O. S., who reported “a fairly large number (18 out of 50) have some defect”.

The results obtained in the Matriculation Examination of the Hong Kong University were very satisfactory.

For the first time in the history of the School a Matriculation Honours Certificate was awarded to one of the students, who also obtained ‘Distinction’ in English. Of the four students in the Matriculation Class three passed, one, as mentioned above, being awarded Honours, and two gaining ‘Distinction’ in English. Of Class 1, one student Matriculated, and of Class 2, two passed, one obtaining ‘Distinction’ in Chemistry, the first student from the School to gain this distinction. The “Montargis French Prizes” (Senior and Junior) were won also.

The work of other Classes (3 to 6 inclusive) shews a decided improvement.

Drawing is again excellent. At the Annual Examinations of the Royal Drawing Society two candidates, having gained Honours in all Divisions, were awarded “Full” certificates, the first time in the history of the School that such certificates have been awarded.

36 'Honours' and 53 'Pass' certificates were gained this year, showing that the high standard of work in the school is being maintained. The general report of the Society stated: "A very good and well sustained result".

Games and Sports flourish exceedingly, swimming being especially popular; two boys (in Class 3) competed in the Harbour Race, one gaining fifth place in excellent time.

Physical Instruction and Boxing Classes were held regularly during the cooler weather. Tennis, Cricket and Hockey are enthusiastically played.

Interest in the Girl Guides is well maintained.

The pupils of this school were again active in the cause of Charity, assisting at the sale of Poppies on Armistice Day and at the Annual Sale of work of the Ministering Children's League. They also contributed to the Navy League Fund in aid of the sufferers in the Wanhsien incident.

The girls of Classes 3 and 4 continued their work in support of the London Hospital, a draft for £21 being sent as the result of their labour.

The Former Pupil's Association is now a very active body and has held many gatherings of a festive character during the year. The water Polo Team again secured second place in the Annual League Competitions.

*Victoria British School*:—Head Mistress, Mrs. E. M. Clark.

The Maximum Enrolment was 51 (50 in 1925).

The Average Attendance was 25 (25 in 1925).

This school, though small, is doing very satisfactory work and meets the requirements of the district in which it is situated. The children are for the most part very young and would be unable to travel any great distance to a school. The health is generally good.

Physical Exercises and Organized Games form part of the daily routine.

*Kowloon Junior School*:—Head Mistress, Miss Mary Cooper, B. A.

The Maximum Enrolment was 104 (104 in 1925).

The Average Attendance was 88 (70 in 1925).

Very satisfactory work has been done during the year.

The results of the Royal Drawing Society Examinations were highly creditable; 1 pupil gained "Honours" in Division 6, and in the Preliminary Division 26 passed, 15 gaining "Honours", while there was only 1 failure.

The Medical Officer of Schools reports favourably upon the health of the pupils.

*Peak School*:—Head Mistress, Mrs. P. Stark.

The Maximum Enrolment was 57 (56 in 1925).

The Average Attendance was 50 (38 in 1925).

Very satisfactory work continues to be done. Twelve pupils were presented for the Royal Drawing Society's Examination; of these ten passed, four with "Honours". The pupils of this School who enter Schools in England continue to do very well.

Two theatrical displays were given during the year and the proceeds sent to England for the maintenance of a cripple child.

*Quarry Bay School*:—Head Mistress, Miss G. M. Cotton.

The Maximum Enrolment was 41 (58 in 1925).

The Average Attendance was 31 (45 in 1925).

In September the school moved into the new premises, a well-planned school building on a fine and breezy site on the hill side. The School Hall is used for assemblies and games, and is also well equipped as a gymnasium.

Very good work is being done.

The health of the pupils has been good.

#### GRANT SCHOOLS.

There are, as last year, twelve English Grant Schools, the Average Attendance of which is 3,433.

All these schools were visited and inspected during the year.

The work done is, generally, very satisfactory; the maximum Grant was awarded to eleven of the Schools.

As in previous years faults and weaknesses, where noticed, were discussed with the Heads of the Schools concerned who ever shew themselves anxious to co-operate with the Education Department, and adopt any suggestions offered.

The chief weakness in all schools is still the English Language, written and spoken.

As in Government Schools, all pupils in Classes 1 and 2—the highest Classes—in the Grant Schools are required to sit for the Examinations of the Hong Kong University.

The results are shewn in detail in Table 5.

Increased attention is being given to Hygiene, Physical Drill and Sports.

#### REPORT ON ENGLISH PRIVATE SCHOOLS, 1926.

Mr. K. L. Chau reports,—*Day Schools.* The total number of schools existing at the end of December stands at 46 as against 36 in 1925; the total number of students enrolled was approximately 2,000, as against some 1,630 in 1925. During the year 19 new schools were registered and nine schools were closed.

Of the existing schools eight are girls' schools, and one is a kindergarten. The remainder are boys' schools of which six prepare students for the Hong Kong Matriculation and the Senior and Junior Locals.

*Night Schools.*—32 schools were registered, and 29 closed—mostly during the latter part of the year—and 89 were in existence on December 31. The total enrolment was 2,497 (1651 in 1925) and the average attendance was 1,786 (1261 in 1925).

The great majority of the night schools are conducted on the premises of Vernacular Day Schools where furniture and apparatus are provided.

E. RALPHS.

*Inspector of English Schools.*

## **Annexe B.**

### REPORT BY THE DIRECTOR OF THE TECHNICAL INSTITUTE, 1926.

(Table X.)

The Institute was open as usual during eight months of the year.

The number of students in attendance during the Session ending June 30th, was 460 against 580 in 1925.

In June—and for Teachers' Classes in December—Examinations were conducted as in previous years by independent examiners. 173 Students were examined (220 in 1925); of these, a total of 71 students or 41% passed (126, or 57% in 1925). As remarked in my last Report the low percentage of passes is due to the high standard required throughout, but particularly in the Teachers' Classes, where it is being raised steadily year by year. Gratifying reports continue to be received of the good work done in various schools of the Colony by Teachers who have been trained in these Classes, this is particularly noticeable in the Gap Road English School and the Cheung Chau School, the Head Masters of which were both trained at the Technical Institute. At the December examination, of 36 Teachers examined in the "English" Classes, 29 passed; in the "Vernacular" Classes 108 Teachers were examined and only 21 passed. Final "Teachers' Certificates" were gained by 5 men and 3 women in the "English" Teachers' Classes and by 3 women in the "Vernacular" Teachers' Classes.

In 1925 an effort was made to establish Cookery Classes at the Technical Institute Centre (Central British School) in Kowloon, in consequence of the popular demand said to exist for such Classes. Due preparations were made and a highly qualified Teacher appointed. Not a single applicant appeared, although pains were taken to have the arrangements made widely advertised. A further attempt to establish a Cookery Class was made during 1926, with gratifying results, no fewer than 4 separate Classes being formed in this subject. It is encouraging to note that at the end of the Course there was a general request from the pupils that a further and more advanced Course be arranged.

Subjects taught during the Session included Building Construction, Electrical Engineering, Mathematics, Chemistry (Practical and Theoretical), Physics, French, Commercial English, Shorthand and Bookkeeping; in the Teachers' Classes the subjects included Psychology, School Management, Practical Teaching, English Literature, Reading and Recitation.

E. RALPHS,

*Director, Technical Institute.*

**Annexe C.**

REPORT BY THE INSPECTOR OF VERNACULAR  
SCHOOLS, 1926.

I.—GOVERNMENT SCHOOLS.

*Vernacular Middle School.*—The Government took over the management of the Confucian Middle School, the amalgamation of which with the Vernacular Normal School provided a nucleus for this new institution which was started in March in the premises of the old Saiyingpun School.

Mr. Li King Hong was transferred from the Inspectorate to take up the Headmastership.

The Maximum Enrolment was 150.

The Average Attendance was 137.

The following is an extract from the Headmaster's Report:—

"The School comprises a Middle School Division, a Normal Division and a Higher Primary Division. One of the chief objects of the Middle School Division is to prepare students for the newly organized Chinese Department of the University of Hong Kong.

Messrs. Fung Ping Shan and Li Yik Mui were appointed by the Government in conjunction with Dr. S. W. Tso and Dr. Wan Man Kai, the 2 Chinese Members of the Board of Education, as "Hok Tung" of the school. Messrs. Fung and Li generously offered to contribute \$1,500 towards the first year's expenses and to give annually a number of free scholarships of \$30 each, the number not to exceed 50 per year.

Special progress was made in Chinese classics, and literary taste has been cultivated; English, both written and spoken, leaves much room for improvement.

In December, four Normal Students sat for their Final Examination and 2 were successful.

Of school sports, Football, Volley Ball and Pingpong are the most popular. Basket Ball and Swimming are also encouraged.

The health of the school has been good on the whole."

*Vernacular Normal School for Women.*—A new development of the school is the addition of the Higher Primary Division, consisting of the 3 Standards, V, VI and VII. This, it is hoped, will prove a worthy feeder of the Normal Division, which it has never been possible to fill by selecting students from outside.

The staff has been strengthened by the appointment of 2 additional assistant mistresses.

The total enrolment was 113.

In December, 9 Final students were examined by an outside examiner, and 5 passed. The remaining 4 students as well as some of the Passed Pupils are staying on to continue their studies at the 3rd year class which will be instituted next year.

The school continues to do very good work under Miss Chan Yat Hing, the Headmistress.

*Taipo Vernacular Normal School.*—This school was opened in March and Mr. Chan Pun Chiu, a Passed Student of the Hong Kong Vernacular Normal School has been in charge.

The Maximum Enrolment was 30. and the Average Attendance, 24.

The object of the school is, as stated in the Director of Education's last Annual Report, to train a new type of Chinese Teacher for the Village Schools. Students are recruited from schools in the Territory, and as it was impossible to find among the applicants for admission a sufficient number of students of the same standard, the first year class is unavoidably somewhat uneven. A few of the class, it is hoped, may be ready to take up teaching after another year's study, but the others require at least 2 more years.

The work done during the year has been very satisfactory.

Provision has been made for an additional class next year, and signs of a hopeful future are not wanting.

## II.—GRANT SCHOOLS.

The 4 Upper grade Grant Schools continue to do very good work. The Maximum Enrolment in the 4 schools was 1,041. and the Average Attendance, 919.

The Maximum Grant was awarded in all cases.

## III.—PRIVATE SCHOOLS, URBAN DISTRICTS.

*Subsidized Schools.*—With 7 removed and 12 added, the number on the present Subsidy List is 191 (186 at the end of 1925). The total enrolment in these schools was 10,665, and the average attendance, 9,596.

The total subsidies paid amount to \$87,480: this works out to be \$8.22 per pupil.

*Non-Subsidized Schools.*—Certificates were issued to 88 new schools. 78 schools have closed during the year. The number existing at the end of the year was 348, with a total enrolment of 16,423 and an average attendance of 14,622.

The total number of Private Day Schools is now 545 (535 in 1925) which consist of 2 Exempted, 4 Grant, 191 Subsidized and 348 Non-Subsidized Schools. Of these, 373 are Boys Schools or Boys' with younger Girls, and 172 Girls or Girls' with younger boys. The Maximum Enrolment was 28,102 (23,707 in 1925 and 28,161 in 1924). Of these, approximately 18,000 were boys and 10,000 girls.

*Free Scholarships.*—The number of Free Scholarships for Boys from Vernacular Schools, tenable at a Government English School was increased from 24 to 30, and, similarly, the number for Girls, tenable at the Belilios Public School, from 12 to 18. Of the former, however, only 24 were awarded, and of the latter, only nine, since a number of candidates failed in the qualifying examination and others were over the age limit for entrants to Government Schools. Four new scholarships tenable at the Vernacular Middle School and open to all Subsidized Schools were competed for by 23 boys from 11 schools, and were awarded to the best four.

*Night Schools.*—12 new Night Schools opened and 15 closed during the year. The number existing at the end of December is 17, with an enrolment of 589 pupils.

All schools have been inspected at least once during the year.

#### IV.—THE RURAL DISTRICTS.

The Rural Districts evince a new interest in education, and the year of 1926 has seen considerable developments. Taipo has become a centre of education, with the establishment in Taipo Market of the Government Vernacular Normal School and also of the Shung Tak Leung Tang (2 Primary Divisions) School, organized by a number of New Territory Elders, and subsidised by Government. This is the biggest modern Vernacular School established in these parts, having an average attendance of 146. The offer of a special subsidy up to \$250 per annum to the distant and the most needy villages has had a good effect.

*Vernacular Subsidized Schools.*—During the year, 107 schools have received Subsidies, some for the whole, and others only a part, of the year. Three of these received special Subsidies: these are (i) The Shung Tak School, Taipo Market, receiving \$1,000 per annum (ii) The Shui Lau Tin School, \$60 per mensem and (iii) The Chung Him School, Fanling, \$25 per mensem. The remaining 104 schools were awarded the ordinary

Subsidies of \$15, \$10, or \$5 per mensem according to their merits. Four Schools having been removed from this list during the year, the number at the end of the year is 103.

*English Subsidized Schools.*—The Saikung English School, under the management of the Roman Catholic Mission received, as in the previous year, a monthly subsidy of \$30. The attendance has fallen to 15 (25 in 1925). This is still the only English School in Saikung District, and the only Private English School in the Territory.

Of the \$12,000 N. T. Subsidies Vote, \$11,933.33 was expended, the cost per pupil working out to be \$3.65 per annum.

*Free Scholarships.*—The number of Free Scholarships tenable at a Government English School, awarded to Vernacular Schools were: 3 to Taipo School, 3 to Un Long School, 6 to Yaumati School (from Sha Tin District) and 4 to King's College (from Tsuen Wan). Three Scholarships were offered to Cheung Chau and the other islands in its neighbourhood, but none has been taken.

*Non-Subsidized Schools.*—51 schools were registered and 42 closed during the year. After several transferences between the Subsidy List and this, the number of schools on this list at the end of December was 84. Notice under S. 17 of the Education Ordinance has been served on one of the thoroughly inefficient schools at Shuen Wan which is due to be struck off the register soon after the new year.

*Attendance.*—The total enrolment in Subsidized Schools was 3,262, including 359 girls, and the average attendance, 2,742. The number in Non-Subsidized Schools was 1,628, (87 girls), and the average attendance, 1,291.

All schools have been visited at least once by myself and several times by a Sub-Inspector.

Y. P. LAW,

*Inspector of Vernacular Schools.*
